8.4 Holiday Settings

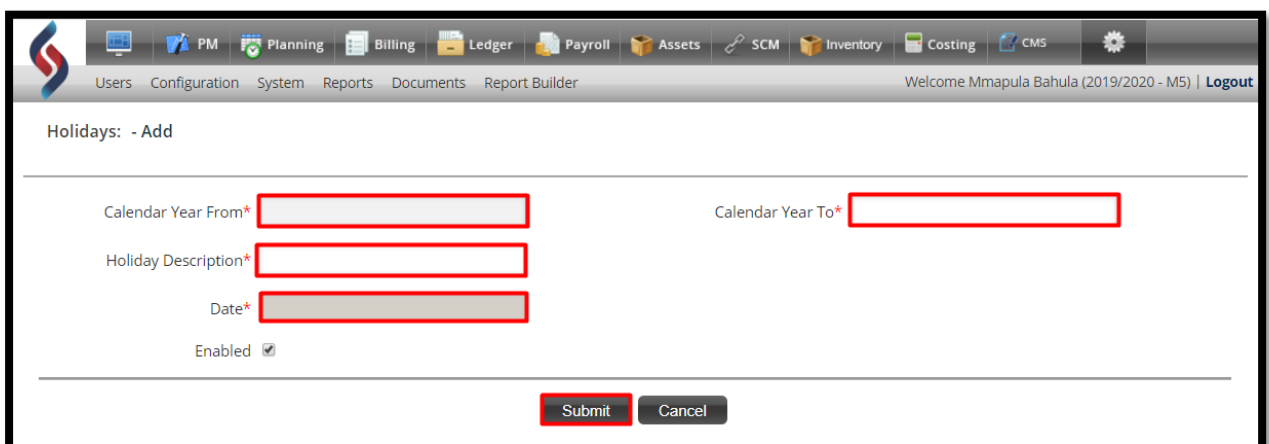

In this section, all public holidays for a specific financial year are captured and modified. The information captured in this section is used for leave purposes.

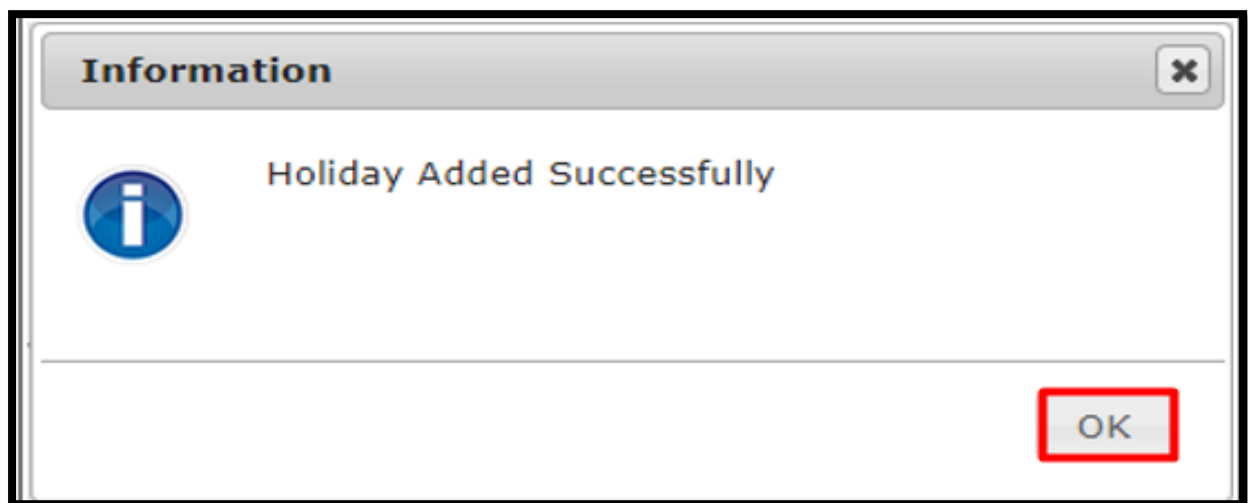

Click “Holidays” from the Time menu.

Click “Add New”.

Step	Field	Description
1.	Calendar Year From*	Capture date from Calendar Year To field- This is the start year on which a Public Holiday will start being effective
2.	Holiday Description*	Capture the name of the Holiday.
3.	Date *	Capture date in the Date field- A date on which that holiday falls in that year if it changes. Eg, the 01st of January of each year will always be New Year's Day in South Africa but the date for a Good Friday holiday differs yearly. These dates must be changed in the beginning of each year.
4.	Calendar Year To*	Capture date from Calendar Year To field- This allows users to specify the end year applicable to this calendar. Since most Public Holidays will be in existence forever and ever, users can put the high date of 9999
7.	Submit	Click "Submit"

Click "Ok"

12.NOTES

This image shows a full page of primary-ruled paper. It features multiple sets of horizontal lines designed to help young learners write neatly. Each set consists of three lines: a solid top line, a dashed middle line, and a solid bottom line. These sets are repeated down the entire page, providing ample space for handwriting practice. The paper is otherwise blank, with no text or other markings.
